LAST OBSTRUCTION IN PANAMA CANAL IS REMOVED, AND WATERS ARE JOINED

PANAMA, Oct. 11.—At 3:43 this afternoon the last obstruction in the Panama canal was removed. Ten year old Kenyon Zinn, son of A. S. Zinn, superintendent of the Culebra division, touched off a small blast in the Cucaracha slide, completing the work begun yesterday and letting the water through. The breach in the obstruction was only a slight one, and only a small stream of water trickled through, but the accomplishment of this breach was historically and practically of greater importance than was the more spectacular blowing up of the Gamboa dike yesterday.

A channel of water has now been established through the entire canal. The average depth is 25 feet. The point at the union of the oceans made today is the last serious impediment to the completion of the canal.

A considerable column of water is flowing tonight through trench made today. It is increasing each hour. Tomorrow a big channel will be allowed to rush through the opening in the hope of partly clearing away the slide.

Dredges are passing through the Pedro Miguel and Miraflores locks for the first time since they were completed. These will be used to attack the Cucaracha slide beginning Monday, while a set of dredges has already been put at work on the other side of the slide as well as a number of sluice pipes near the center.

The joining of the waters today was unexpected. Even Col. Goethals was surprised. He spent much of the day in navigating the canal between Gatun and the Gamboa dike.

Supt. Zinn stole a march on the "chiefs" and only a few workmen were present when the charge was exploded that marked the great event.

When he heard of the work Col. Goethals said: "We are now in a fair way to have canal before long."

Cucaracha slide was 300 feet wide and the engineers underestimated its strength when they ordered a light charge yesterday. The men in charge of that section of the canal were disappointed and workmen were put to work early today clearing away the debris and drilling the holes for the blast this afternoon.

The work proceeded so swiftly that only a slight charge was necessary to make the opening.

Another earthquake shock was felt here tonight but as yet no damage has been reported to the canal or to any property in this vicinity.

MAY TAKE OVER SALT RIVER PRIVATE LATERALS

Phoenix, Ariz., Oct. 11.—Provided the farmers will fulfill certain conditions, the reclamation service will take over and maintain all private laterals in the Salt River valley, delivering water to the corner of each quarter-section.

First, the laterals must be put in first class condition, free of brush and weeds, and second, the owner of each lateral must give up all claim to its right of way.

This proposition was made in response to a request from the Water Users' association that the service take over the laterals. Few farmers will object to the conditions.

Calls Trial Divorce a Success

MRS. JOHN VAN ALSTYNE

Los Angeles, Cal., Oct. 11.—Absence has not made the heart grow fonder in our case. That is, so far as I am concerned. This remarkable statement from the lips of a wife was made by Mrs. John Van Alstyne, wife of St. Joseph, Mo., capitalist, who came here last June to undergo a six-month trial separation from her husband. Mrs. Van Alstyne declares that only three months of the allotted time has given her the realization that she could never again live with her husband. She added most emphatically that she loved no other man.

LOVETT HAS FAITH IN WESTERN TEXAS

Head of Harriman System Says Country West of San Angelo is Full of Promise Under Irrigation.

New York, Oct. 11.—Judge Robert G. Lovett, head of the Harriman system is preparing to start on a trip over the lines under his management next week and it is reported that on his return, about Dec. 1, there may be important announcements as to the policy of the Harriman lines in accelerating the development of the company's territory. He is a confirmed optimist on the future of the southwest, and says: "There are greater opportunities today in Texas for capital and for men of the right sort than in any state I know. It's a great state, but the resources of the western section of the state have hardly been touched. The spread of dry farming is doing much for the upbuilding of the vast stretch of country west of San Angelo. Irrigation will do much more. There are many opportunities for profitable investment there and men of capital are beginning to realize it."

Although in the separation of the Harriman properties Judge Lovett's lines are cast with the Union Pacific, he is a loyal son of Texas and takes a keen interest in anything that affects his native state.

Wall street has been amazed this week at the firmness shown by Judge Lovett, in refusing to cut that Union Pacific melon. As one banker put it: "I doubt if there is another man in the street who could have withstood the tremendous pressure under which Lovett has been, to distribute these millions. He is one of the biggest men who has come into this financial district in my time. Harriman knew what he was about when he chose this Texas lawyer to be his right hand man. When he makes up his mind a certain course is best, he is beyond pressure or influence."

MRS. PANKHURST IS COMING TO NEW YORK

Will Argue Her Own Case If United States Officials Refuse Her Admission; Defends an Actress.

Paris, France, Oct. 11.—Mrs. Pankhurst, the noted suffragette, in an interview, says if there is any objection to her landing in the United States she will plead that her offences are political.

She denounces the action of the United States in the case of Marie Lloyd, recently held up, saying it was a man's action against a woman.

The Lloyd woman, a British actress, was denied admission to the United States until she posted a heavy bond to quit the country as soon as her engagement ended, because she admitted on arriving that the man who accompanied her and occupied a state-room with her was not her husband. She said that she was separated from her husband, but could not get a divorce and marry the man she is now living with. She was kept in detention for several days.

JAILED BOY AND BICYCLE

Jose Garcia was held at the Santa Fe street bridge Saturday night because the bicycle which he was riding did not have a number on it. The police claim the number had been filed off at one time. Both Garcia and the wheel were taken to the station, where they will be investigated by the city detectives.

Certified Milk

Is being delivered to a large number of families other than those who procure it for nursing purposes, because they know that the scientific methods employed in its production and delivery safeguard it from any possible source of contamination. The price is 25 cents per quart, an acknowledged low price for a product of such merit. An increase of over 100 per cent in our sales in one year is evidence of what the public think of it.
